ABOUT ME

I am a meticulous full-stack web developer with expertise in React, Next.js, Tailwind CSS, Firebase, MongoDB and many more. I research new technologies to enhance user experiences. With scalable eCommerce solutions, a Chrome extension, and AI-based web application expertise, I possess expertise in frontend and backend development. I possess skills in I-II/IJX design, API integration, database optimization, and performance-driven development, which allow me to deliver efficient, user-centric solutions with a sharp analytical mind and high attention to detail.

WORK EXPERIENCE

Development Team Lead

2024-Current

Centre of Excellence (Apple Student Community) Chitkara - Rajpura, IN

- Organized events like HackDuet.
- Conducted a hackathon named "TechNova."

PROJECTS

- Built a comprehensive hospital management system built with React, Firebase, and Tailwind CSS. (<https://jatin-yadav05.github.io/hospital-management/>)
- Built a platform where customers can browse and purchase handmade products (<https://jatin-yadav05.github.io/HandiCraft-MarketPlace/>)
- Built an innovative collection of mesmerizing background patterns crafted for modern developers and designers. (<https://jatin-yadav05.github.io/MotifyX/>)

ACCOMPLISHMENTS

- I am incredibly honored and grateful to share that I was selected in Dean's List in Chitkara University with 9.64 CGPA in first sem.
- I successfully secured a Top 10 position among 250+ highly competitive teams at BharatTech-2.0, a prestigious 30-hour hackathon held at SVIET (Swami Vivekanand Institute of Engineering & Technology)
